efficacy

The perfected **instrument**
for the proven **technic**™

The perfected **instrument** for the proven **technic**™

The **Cox**® 7Table™ is the perfected chiropractic instrument for the efficacious **Cox**® Technic. This seventh-generation table, designed by James M. Cox, DC, DACBR—inventor of flexion-distraction protocols—is the culmination of decades of clinical research proving its efficacy; the perfection of prior table designs; and a partnership with Track Corporation, a world-class engineering and manufacturing organization.

"After 27 years of practice, this table is the most significant piece of equipment I have ever purchased and has made a huge impact in patient care." — David Rouse, DC

"I have been using Cox® Tables for 16 years. This is the best table for lumbar distraction that I have ever used!" — Ronald Lucas, DC

Raise the **profile** of your **practice**

TheCox® 7Table™ is *the* instrument that allows Cox® Technic practitioners to adjust unadjustable patients, including those who can't be cavitated and those with radicular disc herniation, degenerative disc, stenosis, and other conditions. Unattended long Y-axis decompression can be applied.

Adjust the **unadjustable**

Experience the satisfaction of adjusting unadjustable patients, only with TheCox®7Table™. Discover increased efficacy as you employ a table and technique backed by extensive research. Enjoy an enhanced reputation as a leading back professional in your community, with other doctors and patients alike seeking your expertise in treating back and neck conditions.

"Patient response with utilization of the Cox® Table has been remarkable! Patient satisfaction in the treatment of stenosis, disc protrusions and scoliosis has been tremendous." — Lawrence S. Nichols, III, DC

The perfected **instrument** for hands-on **healing**

The **Cox®7Table™** and the **Cox®** Technic are designed to use the doctor's hands to guide every aspect of the adjustment. The ergonomic design of The **Cox®7Table™** and the hands-on nature of the **Cox®** Technic combine to create an experience that's physically easier on the doctor and proven efficacious for the patient. Other chiropractic techniques may be practiced on the table as well, with the same ease of use and ergonomic comfort.

"The coupled motion of Y-axis distraction and flexion distraction helps speed the recovery of lumbar disc cases." – Dan Bontrager, DC

The perfected **instrument**, from a proven **partnership**

The **Cox®7Table™** is the result of decades of research by Dr. James Cox and chiropractic researchers, and a partnership with Track, a TS16949, ISO9001:2000/ISO14001 certified, FDA registered medical device manufacturer with experience meeting the high standards of the automotive industry, among others. Track provides The **Cox®7Table™** customers with exceptional service and technical support, while the **Cox®** entities provide day-to-day practice support and continuing education and research, ensuring the ongoing efficacy of The **Cox®7Table™** and the **Cox®** Technic.

"You can't compare the technique or table with any other. It is in a dimension of its own and stands alone. I would truly hate to continue practice without the table or technique." — Ron Wuest, DC
